DETAILED ACTION

Claims 1-23 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 22 and 23, drawn to the compounds, compositions, process of preparing and method of use of the compounds of formula (I) where $n = 1$, classified in class 544, subclass 234 and class 514, subclass 248.
- II. Claims 1, 3-5, 7-16, 22 and 23, drawn to the compounds, compositions, process of preparing and method of use of the compounds of formula (I) where $n = 2$, classified in class 540, subclass 556 and class 514, subclass 220.
- III. Claims 17-21, drawn to the compounds of formulae II, III, IV, V, VI, VII and VIII where $n = 1$, classified in class 548, subclasses 361.1, 361.5, 362.1 and 362.5.
- IV. Claims 17-21, drawn to the compounds of formulae II, III, IV, V, VI, VII and VIII, classified in class 544, subclass 235.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV are directed to structurally dissimilar compounds such that each of the different formulae do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others, for example the tricyclic ring systems where $n = 1$, i.e. 3-oxo-2,5-methano-2H-1,2,4-benzotriazepine is different from the tricyclic ring systems where $n = 2$, the bicyclic ring systems of formulae II, III, IV, V, VI, VII and VIII where $n = 1$ forming a 5-6 fused ring

Art Unit: 1624

system, and the bicyclic ring systems of formulae II, III, IV, V, VI, VII and VIII where $n = 2$ forming a 6-6 fused ring system, etc. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Tentative election of a single species within the elected group is further required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
